Electric Gear Drive Converter

GB-2300

Now you can easily convert your existing hydraulic units in the AM1424 and TM series to variable speed electric power.

Completely variable speeds

- Choose from our high-speed model (24-238 rpm) or for increased torque our slower speed model (12-120 rpm).
- The GB-2300 Electric Gear Drive benefits include:
- Increased portability.
- Completely variable speed.
- Light-weight.
- Multiple positioning drive head to change electric motor location.

When the repair situation has restrictions - you now have another option.

PORTABLE ALIGN BORING
