PORTABLE ALIGN BORING

Bore Measuring Telescoping Gauge

TBMT-2300-(size)

Variety of ranges available - meeting the requirements of most heavy equipment's bore repair: 2" - 6", 1.25" - 6", 1.25" - 10"

- So simple to use! Measure a bore inside diameter (I.D.) without pulling the boring bar.
- Designed for operators by an operator. Will save your operator time and save your operation money.
- This telescoping gauge measures the I.D. of the bore through an open tool port in the boring bar. It is spring loaded so the operator can get an exact measurement (within .0005 per inch) without having to remove the boring bar from the bore.
- Designed with hardened measuring tips for rugged durability and consistent accuracy.
- This superior quality translates to a long lasting tool and more savings.
- Fits through all makes of boring bars $\frac{1}{2}$ " tool ports and most $\frac{3}{8}$ " tool ports.
