

B&D Manufacturing Ltd. has been a leader in the mining manufacturing industry for over 40 years and is looking for a Quality Inspector to contribute to the continued track record of success. We are looking for a detail-oriented individual that lives and breathes our core values of Passion, Recognition, Innovation, Dedication and Empowerment. Reporting to the Quality/Warehouse Supervisor, the Quality Inspector is responsible for scheduling and prioritizing daily inspection work in the Quality Department as needed. The Quality Inspector works in collaboration with the Quality/Warehouse Supervisor, Coordinator, and Department Supervisors to ensure product and process compliance to the Quality Management System.

Quality Inspector

What you will do

- Certify and perform gauge calibration and schedules on all measuring equipment.
- Ability to interpret GD&T data and a sound understanding of metric and imperial tolerances.
- Ability to perform dimensional and visual inspection for a wide variety of machined and/or fabricated components.
- A strong understanding in blueprint reading is an asset.
- Ability to perform various computer functions using Microsoft Office.
- Ability to effectively present reports and respond to questions from management, employees, suppliers, and customers.
- A proactive approach in maintaining a quality system in order to provide a product that meets or exceeds customer satisfaction.
- Ability to interpret written reports, correspondence, instructions, procedures along with the discretion and tact to maintain confidentiality.
- Assist in resolving non-conforming product, by executing an investigation to determine root cause, and provide a corrective action for internal, supplier, and customer issues.
- Experience in machining and the basic understanding of mills and lathes is an asset.
- Experience in welding and fabrication is an asset.
- Perform inspections, checks and tests for the purpose of quality control at all stages of production as job specific requirements
- Ensure all job specific documentation has been completed
- Identify necessary print and template revisions
- Exercise authority over, and responsibility for, the final inspection and release of product to the customer
- Confirm final products are properly and adequately identified
- Affix nameplates, load rating stickers, S.O.P. stickers and similar product-specific documentation to the final product
- Report non-conformance to applicable department managers/supervisors.

What we need

- College Diploma in a related field preferred
- Experience in Machining and/or fabrication is considered an asset
- Knowledge of CWB and ISO Standards and experience working in an ISO quality environment is an asset
- Excellent written and verbal communication skills
- Ability to use good judgment to plan and accomplish goals
- Familiar with a variety of the field's concepts, practices, and procedures
- Demonstrate and apply strong problem solving skills in day to day operations
- Ability to effectively communicate and problem solve within a Team Environment
- Self-starter with the ability to work effectively with very little to no supervision
- Knowledge of Health and Safety Regulations as outlined in the Occupational Health and Safety Act and maintains a strong commitment to the B&D Manufacturing Safety Program at all times

What we love

- Strong work ethic
- Positive Attitude
- Collaboration
- Innovative Thinking
- Safety and Quality Conscientious

Job Type

- Full-time, Permanent

Benefits

- Above average compensation
- Comprehensive Health Benefits
- Matching RRSP
