

hydraulic jacking system

BDHJ-50-48

B & D Manufacturing Ltd. proudly introduces the BDHJ-50-48 Hydraulic Jacking System, engineered for maximum performance, reliability, and safety. Built to handle the toughest jobs, this 50-ton hydraulic jacking system is designed with cutting-edge features to ensure efficient lifting, safe operation, and long-lasting durability. Whether used in construction, mining, or heavy equipment maintenance, this industrial-grade hydraulic jack delivers dependable performance when you need it most.

FEATURES

- 50-Ton double-acting hydraulic cylinders
- Onboard hydraulics — push the button and go
- 20" (50.8 cm) stroke
- 46" (116.8 cm) base height
- 66" (167.6 cm) fully extended
- Foam-filled tires
- Safety collars
- Adjustable handle

WHY CHOOSE B & D MANUFACTURING LTD.?

With decades of expertise in custom hydraulic systems and heavy-duty lifting equipment, B & D Manufacturing Ltd. continues to set the standard for reliability and innovation. Our commitment to engineering excellence ensures every system is built to withstand extreme conditions and deliver superior results.

Specifications may change without notice.

BDHJ-50-48 Hydraulic Jacking System — Specifications

Capacity	
Lift capacity	50 Ton / 45.4 MT
Cylinder	
Type	Double-acting hydraulic
Stroke	20" / 50.8 cm
Dimensions	
Base height (retracted)	46" / 116.8 cm
Height fully extended	66" / 167.6 cm
Mobility	
Tires	Foam-filled, low-maintenance
Handle	Adjustable, for placement & maneuverability
Safety	
Load securement	Safety collars
Operation	Onboard hydraulics — push-button control

APPLICATIONS

- Mining equipment maintenance
- Heavy construction projects
- Industrial lifting operations
- Infrastructure support and stabilization

Invest in strength, safety, and innovation. Contact B & D Manufacturing Ltd. today to learn more about the BDHJ-50-48 Hydraulic Jacking System and discover how it can improve your heavy-lifting operations.
